

Self-Drilling Gypsum Wallboard Anchors

Product Self-Drilling Anchors (723 Series)

Purpose The DiversiTech self-drilling gypsum wallboard anchors pre-drill precise holes into gypsum wallboard with no special tools required.

- Features**
- Quick and easy installation with a #2 or #3 Phillips screwdriver, slotted driver, or power driver
 - Plastic plugs and toggles are easily replaced with the deep threaded products
 - Full range to cover all wall-fastening applications
 - Available in corrosion-resistant and non-conductive white nylon
 - Low-profile head that can be easily backed out
 - They provide strong engagement in 3/4in, 1/2in, and 5/8in gypsum wallboard
 - Supplied with combo head screws
 - Audible click lets you know when the anchor is firmly set
