

# THE LINESET BOX

LINE SET ROUGH IN BOX

## INSTALLATION GUIDE

- Cut a 5 ¾" X 10 ¾" rough opening. **Fig.1**
- Install the Line Set Box and secure with 8 - ¾" long galvanized deck screws (or equal). **Fig.2**
- Cut a hole with a hole-saw in the top of the box to the size of the line set. (For a 7/8 x 3/8 line set use a 1 7/8" hole-saw)
- Run the line set into the box to the bottom or thru it if you like to leave it long. **Fig.3**
- Run the low voltage wire into to box following the line set.
- Cut a 2nd hole in the top of the Line Set Box to run the condensation drain. (For a ¾" schedule 40 PVC use a 1" hole-saw)
- Cut a 7 inch long stub and glue it on a coupling. **Fig.4 & 5**
- Insert the 7 inch long stub into the hole you just made for the condensation drain. **Fig.6**
- Push the stub down until the coupling is tight to the top. **Fig 7**
- (This will insure that the condensation drain is sturdy, square and plumb in the box and will not be affected by other contractors and moved around from the in-side) **Fig.8**
- Finished look. **Fig.9**
- Seal all holes from the inside.
