Providing best-in-class HVAC/R service and support is what you do, and relying on dependable product solutions is critical to getting the job done right — and to your customer's satisfaction. We understand that preventing water damage due to condensate overflow is a top concern, made even more challenging with the variety of installation situations and the ongoing need for maintenance to keep the condensate system clear from blockages.

Meet Asurity® brand of condensate management products that provide a complete system of pumps, switches, drain pans, and treatments supported by highly trained technical support when you need it. At Asurity, we do more than create complete system solutions, we create peace of mind.

**Getting the job done isn't enough.  
It needs to be done right.**

We get that. That's why Asurity® products are part of a complete system of condensate management solutions designed to work together. Why piece a system together when Asurity offers everything you need to install a superior condensate management solution for your customer?

We offer a full range of pumps from standard, high-temperature, flow, or lift applications in standard height and low-profile configurations. Our switches complement our range of pumps. Whether installed in a primary pan, secondary pan, inline, or for flood detection, we have a switch to meet the needs of your installation. Secondary drain pans are a critical component of an installation, providing additional peace of mind if the primary pan overflows, water damage won't occur. The Asurity line offers a full range of metal, plastic, and specialty drain pans. Our full range is complete with treatments to neutralize acid condensate, and pan strips and tablets to keep the system free from blockages.

CONDENSATE MANAGEMENT**

# The Asurity® Promise

## Tired of callbacks from water damage?

That's why we make it easy to protect your customers and your reputation with added protection on your condensate management install and coverage against water damage. Receive 2 years of protection for water damage claims up to \$2,500 when you install an Asurity system following our guidelines. And for unbeatable protection, choose our 4-year coverage when you add a 3-year maintenance agreement for protection from water damage claims up to \$2,500. Register your Asurity products on the Asurity App for easy access to protection details for each install.

# Condensate Pumps

Pumps are often the heart of a complete condensate management system. With simple installation, high durability, and long-term reliability, they effortlessly pump water wherever it needs to go. Every pump is designed to help you get the job done right, regardless of the application.

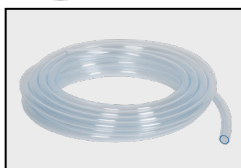

# Tank Pumps

Pumps with extra features, adding even more condensate performance and protection.

Condensate Pump  
ULTRAIQP

**T = Includes Tubing**  
20' Clear Vinyl 3/8" Tubing

## ULTRAIQP Condensate Pump

### FEATURES:

- Most Advanced, Intelligent Condensate Pump Available
- TMR Sensor Technology (Tunneling Magnetoresistance) Senses Water Flow and Automatically Adjusts Motor Speed allowing for Quiet Operation Minimize Pump Noise.
- Self-cleaning. Detects potential line blockages and automatically. Increases Water Pressure and Pulses to Quickly Clear the Clog.
- Equipped with "End-Of-Season" Mode, after 30-days of Not Detecting Water, the Pump Automatically Drains Water from the Tank.
- Built-In Safety Overflow Switch with Translucent Tank for Easy & Fast Inspection

**PROCP-46 Condensate Pump**  
**Acidic, Max Temp. & High Lift**

- FEATURES:**
- Handles Acidic and Non-Acidic Condensate up to 212° F
  - Large 1-Gallon Tank Instantly Reduces Temperature of Boiler & Steam Humidifier Discharge
  - Flow Rate up to 190 Gallons Per Hour
  - Quarter-Turn Removable Check Valve
  - Built-In Safety Overflow Switch

PROCP-46	120 VAC 60 Hz	49' LIFT
PROCP-46-230	230 VAC 60 Hz	49' LIFT

## Ductless

A variety of convenient and long-lasting ductless pumps designed for a wide variety of applications.

### Condensate Pump Ductless Standard Applications

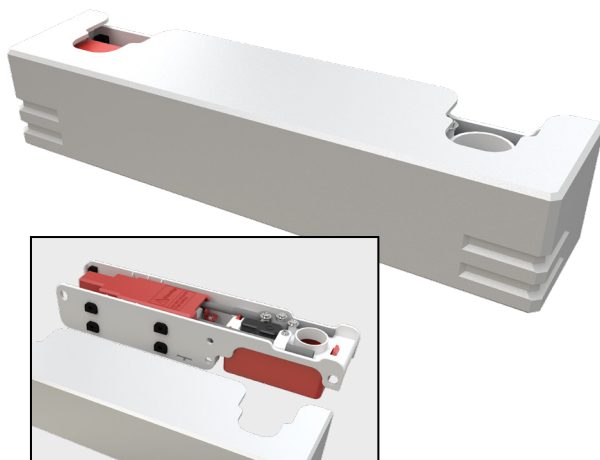

#### FEATURES:

- Ultra Quiet Piston Pump, (19 dBA)
- Compact Design for Mini-Splits
- Built-In Safety Overflow Switch
- Easy Installation & Maintenance
- Anti-Vibration Mounts
- Built-In Check Valve Preventing Backflow
- Max Output 24,000 BTU/h, 7 kW

QUIETMINI-I

115 - 230 VAC 60 Hz

## Switches

Our switches are the brains of the operation. Designed to detect problems and shut the entire system off in case of water overflow or a clog in the condensate drain line, our switches add another layer of protection.

- Flood Switch
- Inline Switches
- Primary Drain Pan Switches
- Secondary Drain Pan Switches

## Leak Detector

The Asurity® Leak Detector is designed to prevent flooding, damage to carpets, walls, furniture, and ceilings. Turns system off when detecting moisture due to condensate or drain leaks. When water is detected, it turns system off, alerting the homeowner or service person to potential moisture problems.

### FEATURES:

- Innovative 3D textured base disrupts surface tension for faster water detection and reset times
- LED Indicators Confirm System Status, (Power, Moisture Detected)
- Connect Multiple Switches to Expand Protection Area
- Flexible Placement Options
- Can Be Connected to Multiple Pieces of Equipment
- Self-Resetting Once Moisture is Removed

## Switches

# Wet Switch® Flood Detectors

## Connected Wet Switch® Smart Wi-Fi Enabled Flood Detector

The Asurity® WS-1C Wet Switch® Connected Flood Detector is a smart Wi-Fi enabled switch that communicates directly to the homeowner, contractor or building manager that the switch has been tripped alerting them to a potential problem, via text or email. The Connected Wet Switch is designed to prevent flooding, damage to carpets, walls, furniture, and ceilings. It turns the system off when detecting moisture due to condensate or drain leaks and includes a built-in test and reset button. One or two drops is all it takes to turn system off, immediately sending a text or email alert to the homeowner or service person about potential moisture problems.

### FEATURES:

- Texts and Emails the Contact Provided to Ensure Immediate Action is Taken
- Turns Off Equipment with As Few As 1-2 Drops of Water Detection
- LED Indicators Confirm System Status
- Connect Multiple Switches to Expand Protection Area
- Flexible Placement Options
- Can Be Connected to Multiple Pieces of Equipment
- Label for Contractor Information

# Wet Switch Flood Detectors

## Wet Switch® Original and Dual Voltage Flood Detectors

### WS-1/WS-2DV FEATURES:

- Turns Off with as Few as 1-2 Drops of Water Detection
- LED Indicators
- Connect Multiple Switches to Expand Protection Area
- Flexible Placement Options

### WS-2DV SPECIFIC FEATURES:

- 12 Volt: Integrates into Building Automation Systems and Transmits Alarm Signal with as Few as 1-2 Drops of Water Detection
- 24 Volt: Works with All HVAC Systems

## Float Switches

## Latching Float Switch

### FEATURES:

- Prevents Short Cycling that Can Lead to Equipment Damage
- Less Intermittent or False Tripping
- Float Latches When Tripped
- Checks and Measures Water Levels
- 2 Adapters Included

BG-301+

## Latching Secondary Pan Float Switch

### FEATURES:

- This Switch Shuts Down the HVAC System to Prevent Flood Damage
- Prevents Short Cycling that Can Lead to Equipment Damage
- Works on Both Metal and Plastic Drain Pans

BG-101

## Latching Secondary Pan Float Switch

### FEATURES:

- Latching Float Switch for Preventing Drain Pan Overflow
- Prevents Short Cycling
- Designed for Metal Drain Pans

## PRO-TREAT® In-Line Switch and Slow Release Treatment System

Asurity® PRO-TREAT® In-Line BG-402 is an inline latching condensate safety switch with a patent-pending auto-dosing treatment delivery system. As the condensate water passes through the switch and over the treatment tablets, the condensate line is constantly dosed with treatment to keep the lines clear and flowing properly, for up to 6 months.

### FEATURES:

- Auto-Dosing Treatment Keeps Drain Lines Clean, Saving Time and Money by Preventing Buildup
- Treatment Formulated with Copper and Zinc to Eliminate Odors
- Safe, Non-Corrosive and 100% Soluble Condensate Line Treatment
- Switch Shuts Down the HVAC System to Prevent Flood Damage, until Manually Reset
- Latching Switch Prevents Short Cycling that Can Lead to Equipment Damage
- Includes one treatment cartridge; replacement cartridges sold separately (BG-40R)

# Drain Pans

Our drain pans are engineered to provide that extra level of confidence. We offer standard plastic and metal pans made with rolled edges for durability, ribbed bottoms for rigidity, and reinforced corners for strength; while our specialty high rise drain pans feature risers for additional height. These drain pans are the backbone of our complete condensate system.

# Treatments

High-efficiency furnaces and on-demand water heaters are great for the environment, but their acidic condensate is not. Asurity® condensate treatments neutralize the condensate eliminating corrosive damage. Wet environments can cause slime and sludge build-up, leading to blockages. Our range of pan treatment products protect the condensate system reducing maintenance between visits.
